

```
public class ArrayExample {

    public static void main(String[] args) {

        int[] intArray = {1, 2, 3, 4, 5};
        System.out.println("Elements of intArray:");
        for (int i = 0; i < intArray.length; i++) {
            System.out.print(intArray[i] + " ");
        }
        System.out.println();

        intArray[2] = 10;

        System.out.println("Updated elements of intArray:");
        for (int num : intArray) {
            System.out.print(num + " ");
        }
        System.out.println();
        String[] stringArray = {"Java", "is", "fun"};

        System.out.println("Elements of stringArray:");
        for (String str : stringArray) {
            System.out.print(str + " ");
        }
        System.out.println();
    }
}
```
